Service Line Installation Date			Describe the Field Verification Method	Enter the Date of Field Verification				Service Line Material Classification	Describe the Field Verification Method	Enter the Date of Field Verification			
A Unique ID by the public water system for each service line.								Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.								If "Non-Lead Other", describe in Comments field. Important for determining if service line requires replacement. Estimated date when the service line was installed or replaced. Select option from drop down list. If "Other", describe in the Notes field. If "Other", describe in the Notes field. Estimated date of field verification or date that the record was updated. If "Non-Lead Other", describe in Comments field. If "Other", describe in the Notes field. If "Other", describe in the Notes field. Estimated date of field verification or date that the record was updated.							
Example 1 (DO NOT DELETE)	1234	First St.	First City	88888	Test County	##.8888	-##.8888	Non-Lead - Copper	Yes	3/28/2009	Field inspection only with no records	No	Lead	Previous materials evaluation	Yes	Visual inspection at meter pit	5/2/2019

A unique ID by the public water system for each service line.																			
Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.																			
Important for determining if service line requires replacement																			
Select option from drop down list. If "Other", describe in the Notes field																			
Estimated date of field verification or date that the record was updated																			
If "Non-Lead Other", describe in Comments field																			
If Other, describe in the Notes field

A Unique ID by the public water system for each service line. Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.

									Was Material Ever Previously Lead?	Service Line Installation Date			Describe the Field Verification Method	Enter the Date of Field Verification				Describe the Field Verification Method	Enter the Date of Field Verification				
A Unique ID by the public water system for each service line.								Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.								If "Non-Lead Other", describe in Comments field.							
								Important for determining if service line requires replacement								Estimated date when the service line was installed or replaced							
								Select option from drop down list. If "Other", describe in the Notes field								Estimated date of field verification or date that the record was updated							
								If "Non-Lead Other", describe in Comments field								If "Other", describe in the Notes field							
								If "Other", describe in the Notes field								Estimated date of field verification or date that the record was updated

Unique Service Line ID	Street Number	Street Name	City	Zip Code	County	Latitude	Longitude		Was Material Ever Previously Lead?	Service Line Installation Date			Describe the Field Verification Method	Enter the Date of Field Verification			Describe the Field Verification Method	Enter the Date of Field Verification		
A Unique ID by the public water system for each service line. Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.								If "Non-Lead Other", describe in Comments field		Important for determining if service line requires replacement	Estimated date when the service line was installed or replaced	Select option from drop down list. If "Other," describe in the Notes field		If Other, describe in the Notes field	Estimated date of field verification or date that the record was updated	If "Non-Lead Other", describe in Comments field	If Other, describe in the Notes field		If Other, describe in the Notes field	Estimated date of field verification or date that the record was updated
